

## United States of America - High pathogenicity avian influenza viruses (poultry) (Inf. with) - Follow-up report 153

### GENERAL INFORMATION

COUNTRY/TERRITORY OR ZONE	ANIMAL TYPE	DISEASE CATEGORY	EVENT ID
ZONE	TERRESTRIAL	Listed disease	4309
DISEASE	CAUSAL AGENT	GENOTYPE / SEROTYPE / SUBTYPE	START DATE
High pathogenicity avian influenza viruses (poultry) (Inf. with)	Highly pathogenic avian influenza virus	H5N1	2022/02/07
REASON FOR NOTIFICATION	DATE OF LAST OCCURRENCE	CONFIRMATION DATE	EVENT STATUS
Recurrence of an eradicated disease	2020/05/28	2022/02/08	On-going
END DATE	SELF-DECLARATION		
-	NO		

### REPORT INFORMATION

REPORT NUMBER	REPORT ID	REPORT REFERENCE	REPORT DATE
Follow-up report 153	FUR_171611	-	2025/01/24
REPORT STATUS	NO EVOLUTION REPORT		
Validated	-		

### EPIDEMIOLOGY

#### SOURCE OF EVENT OR ORIGIN OF INFECTION

- Unknown or inconclusive

#### EPIDEMIOLOGICAL COMMENTS

The USDA Animal and Plant Health Inspection Service (APHIS), in conjunction with State Animal Health and Wildlife Officials, are conducting comprehensive epidemiological investigations and enhanced surveillance in response to the HPAI H5N1 related events. Affected population counts are based on estimated inventories from the date the outbreak was first reported to the World Organisation for Animal Health. HPAI events are now closed and control areas have been released in the following States: Alaska, Arizona, Colorado, Kentucky, Maine, Massachusetts, Nevada, New Hampshire, New Jersey, New Mexico, Pennsylvania, Texas, Utah, and Washington. These States have not had any recent HPAI events and have demonstrated:

- Required surveillance in the State and control areas has been completed with negative results for HPAI. As a precaution, additional enhanced surveillance may continue in the State and area.
- Depopulation of infected premises has been completed and appropriate disposal was implemented or completed.
- Cleaning and disinfection of the infected premises has been completed (including, but not limited to, outside areas of premises, equipment, trucks, and other fomites).

Note (26/10/2022): After reassessment by field investigators, outbreak OB\_107904 has been designated as a non-poultry premises and subsequently removed from this event.

QUANTITATIVE DATA SUMMARY
